

The Moose Jaw Branch of the Saskatchewan Genealogical Society (SGS) invite you to join them for

An Introduction to Eastern European Genealogy

Success in eastern European genealogical research starts with a good foundation and is incumbent upon correctly identifying the ancestral village. This overview presentation will touch on genealogy basics, suggest useful resources, demonstrate sample records, and provide tips for confirming the village name.

Saturday, September 25, 2021 at 10:30 a.m. CST via Zoom

Pre-registration is required. The pre-registration link is

Keep in mind it is not the link to access the presentation. After registering you will receive a confirmation email with information about joining the meeting.

About the Presenter:

Chris Bukoski (nee Winowich) is a recently retired federal employee who grew up in Hudson Bay, SK but now resides in Winnipeg, MB. Her interest in genealogy began in the early 1990s but it wasn't until the late 1990s—when Family Tree Maker came co-packaged with tax software—that the genealogy bug bit! Soon after, she joined the East European Genealogical Society where she served on Council or the Executive every year except one since 2001. She currently is the Program Chair. Chris' most exciting genealogical experience to date was a trip to Ukraine in 2011 to visit her paternal grandparents' ancestral villages. She found family in both villages including a second cousin.
